RECEIVED

DEC 23 2002

PETITION UNDER 37 CFR 1.181

TECHNOLOGY CENTER R3700

Sir:

Applicant respectfully petitions, through his attorney of record, the Assistant Commissioner for Patents, to revive the above-identified application. The application became unintentionally abandoned for failure to properly respond to the Office Action, June 26, 2001, which is attached hereto as Tab 1. A Petition to Withdraw Holding of Abandonment – Office Action Not Received, dated October 1, 2002, was dismissed by the USPTO on October 18, 2002, which is attached hereto as Tab 2.

Applicants reported the reason the Office Action of June 26, 2001 was not received was because it had been addressed and sent to the applicants' old mailing address of P.O. Box 31, Petersburg, Virginia 23804 (hereinafter "Petersburg"). However, the "Petersburg" address is still active and receiving mail and is set to be discontinued on January 2, 2003, as evidenced by the attached letter and Official Change of Address Form to the U.S. Post Office (copies attached), dated December 3, 2002. Therefore, both addresses for Honeywell International were in existence at the time the Office Action of June 26, 2001 and the Notice of Allowance of July 2, 2002, were mailed. Applicant acknowledges that it received the USPTO's Decision on

BEST AVAILABLE COPY

Petition dated October 18, 2002, in duplicate (one being addressed to the "Petersburg" address and one being addressed to the "Colonial Heights" address).

Applicant still maintains that the Office Action of June 21, 2001, was not received by our office, as previously stated, and, as evidenced by documentation in our October 1, 2002 Petition. Therefore, applicant requests that the USPTO reconsider its decision, based on this new information, and withdraw the Notice of Abandonment.

This petition is filed within two (2) months of the date of Decision on Petition, October 18, 2002.

In view of the above, a favorable decision is respectfully requested.

Respectfully submitted,
IGOR PALLEY ET AL.

PETITION TO WITHDRAW HOLDING OF ABANDONMENT - OFFICE

ACTION NOT RECEIVED

Sir:

I hereby petition to withdraw the holding of abandonment in the above-referenced case and to revive same. The Notice of Abandonment dated July 2, 2002, was received by Applicants via facsimile on October 1, 2002, as a result of a status inquiry.

Applicants' attorney reviewed this case and discovered no actions had been received subsequent to applicants' response on May 17, 2001. On September 24, 2002, Becky Kirk, Legal Assistant for applicant, contacted Examiner Elishway for a status inquiry. At that time applicants were advised that this case had been abandoned for failure to respond to the June 26, 2001 Office Action and that a Notice of Abandonment was mailed July 2, 2002. It was then discovered the Office Action was addressed to P.O. Box 31, Petersburg, VA instead of 15801 Woods Edge Road, Colonial Heights, VA. This is the reason that applicants did not receive the Office Action, and therefore, request a Petition to Withdraw Holding of Abandonment for failure to receive the Office Action of June 26, 2001, forming the basis of the abandonment.

I hereby state that the Examiner's Action of June 26, 2001 and the Notice of Abandonment of July 2, 2002 were not received. An extensive search of the file jacket

BEST AVAILABLE COPY

and the docket records in my office indicates that this Office Action and Abandonment were not received, as a result of the wrong mailing address.

I attach a copy of the outside of the file jacket, where the decision would have been entered had it been received and docketed. Also attached is a page print from our PCMaster Data Control database that lists actions due and responses completed, as well as date and time of last entry updates.

Also attached is a New Power of Attorney and Change of Correspondence Address form.

In consideration of these submissions, it is respectfully requested that the holding of abandonment be withdrawn and the case revived, a copy of the Office Action be sent to Applicants, and the statutory period for response be reset to the re-mailing of the office action.

Applicants respectfully request that the petition fee of \$130.00 be charged to Account No. 01-1125. A duplicate copy of this petition is enclosed. Please charge Account No. 01-1125 for any fee deficiency or credit this account for any overpayment for this petition.

Respectfully submitted,
IGOR PALLEY ET AL.

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 May 2001.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION*Specification*

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 8-13, 16, 17, 20, 21, 25-43 and 46-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sacks (U.S. 5,249,534) in view of Mykleby (U.S. 4,266,670). Sacks discloses the claimed device except for the loops at the ends of the band and except for the pin. Mykleby discloses that it is known in the art to connect two ends with a pin extending through loops in each end (see elements 32 and 42 in figure 8). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the band of Sacks with the band ends having loops which are connected by a pin, as taught by Mykleby, in order to fasten the two band ends together more securely. The pin and loop engagement would be more secure than the hook and loop engagement discussed in Sacks.

Application/Control Number: 08/747,471

Page 3

Art Unit: 3727

Sacks teaches a band which is discussed in col. 2 lines 4-7. The band can be made of SPECTRA, as set forth in col. 1 lines 33-42. Regarding claim 13, the container about which the band is located is discussed in col. 1 line 65- col. 2 line 7 of Sacks.

Regarding the term "integral" in claim 27, the term "integral" is sufficiently broad to embrace constructions united by such means as fastening and welding (in re Hotte (C.C.P.A.) 157 U.S.P.Q. 326); the term is not necessarily restricted to a one-piece article (in re Kohno (C.C.P.A.) 157 U.S.P.Q. 275); and may be construed as relatively broad (in re Dike (C.C.P.A.) 157 U.S.P.Q. 581).

4. Claims 3-6, 22, 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sacks in view of Mykleby, as applied to claims 1 and 17 above, and further in view of Kolom (U.S. 5,054,635). The modified device of Sacks does not teach the material of the pins. Kolom teaches that it is known to provide a container with pins which are made of metal (see col. 4 line 68- col. 5 line 2). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified container of Sacks with the pins being made of the material discussed in Kolom, in order to make the pins of increased strength.

5. Claims 7 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sacks in view of Mykleby, as applied to claims 1 and 17 above, and further in view of Sholl (U.S. 3,611,512). The modified device of Sacks discloses the claimed invention except for the pin being a rope. Sholl teaches that it is known to provide a pin made of rope (see element 22). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified band of Sacks with the pin being made of rope, as taught by Sholl, in order to use less expensive material.

6. Claims 14, 15, 18, 19, 44 and 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sacks in view of Mykleby, as applied to claims 13, 17 and 39 above, and further in view Gettle et al. (U.S. 5,225,622). The modified device of Sacks discloses the claimed invention except for the blast mitigating material. Gettle et al. teach that it is known to provide a container with aqueous foam (see

Application/Control Number: 08/747,471

Page 4

Art Unit: 3727

line 11 of the Abstract). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified container of Sacks with the aqueous foam of Gettle et al., in order to attenuate pressure waves.

7. Claim 51 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chavez (U.S. 5,033,161) in view of Sholl (U.S. 3,611,512). Chavez discloses the claimed invention except for the pin being a rope. Sholl teaches that it is known to provide a pin made of rope (see element 22). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the hinge of Chavez with the pin being made of rope, as taught by Sholl, in order to use less expensive material.

8. Claim 52 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sacks (U.S. 5,249,534) in view of Chavez (U.S. 5,033,161). Sacks discloses the claimed device except for the loops at the ends of the band and except for the pin. Chavez discloses that it is known in the art to connect two ends with a pin extending through loops in each end (see elements 3 and 5). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the band of Sacks with the band ends having loops which are connected by a pin, as taught by Chavez, in order to fasten the two band ends together more securely. The pin and loop engagement would be more secure than the hook and loop engagement discussed in Sacks.

Allowable Subject Matter

9. Claims 7 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 08/747,471

Page 5

Art Unit: 3727

Response to Arguments

10. Applicant's arguments filed May 17, 2001 have been fully considered but they are not persuasive.

11. *Claims 1, 2, 8-13, 16, 17, 20, 21, 25-43 and 46-50 remain rejected over Sacks, as modified by Mykleby.*

Applicant argues that "Sacks fails to teach the interrupted band" (page 2 of response). The examiner disagrees with this position. Sacks teaches the use of three interrupted bands encircling a container. Specifically, in col. 1 lines 65-68, Sacks sets forth a first interrupted/discontinuous band. In col. 1 line 68 through col. 2 line 4, Sacks discloses a second interrupted/discontinuous band and in col. 2 lines 4-7 Sacks discloses a third interrupted/discontinuous band wherein the two ends are connected together.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Sacks teaches that two ends of an interrupted/discontinuous band are connected together (col. 2 lines 4-7) and Mykleby teaches a means to connect two ends together. The teaching and suggestion to connect two ends together using a pin and loop assembly is found in the secondary reference of Mykleby.

Applicant states that one end of the band of Sacks is "covered by subsequent wraps/turns of the band" (page 3 of response). This may be the case in a certain embodiment of the Sacks invention,

Application/Control Number: 08/747,471

Page 6

Art Unit: 3727

however, it is not the case in every embodiment of the Sacks invention. Sacks specifically states in col. 2 lines 4-7 that the third panel or band has "its ends connected together".

12. *Claims 3-6, 22 and 23 remain rejected over Sacks, as modified by Mykleby and Kolom.*

13. Applicant argues that Kolom does not teach the use of a high strength fiber. The examiner disagrees with this position. Firstly, it is noted that the features upon which applicant relies (i.e., the use of high strength fibers) are not recited in the rejected claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claims 3 and 22 recite that the pin is made of a "material being selected from the group consisting of metal...". In col. 4 line 68 through col. 5 line 2, Kolom discloses that the pin may be made of steel or aluminum.

Claim 4 sets forth that the pin is made of a "metal being selected from the group consisting of steel, steel alloys, aluminum ...". In col. 4 line 68 through col. 5 line 2, Kolom discloses that the pin may be made of steel or aluminum.

Claim 5 sets forth that the pin is made of "reinforcing fiber being selected from the group consisting of aluminum fibers ... steel fibers". In col. 4 line 68 through col. 5 line 2, Kolom discloses that the pin may be made of steel, aluminum or multi-strand filament. The term filament is defined in Webster's New Riverside University Dictionary (1994) as "[a] fine or thinly spun thread, fiber, or wire." (emphasis added)

14. *Claims 7 and 24 were rejected over Sacks, as modified by Mykleby and Sholl.*

The rejection of claims 7 and 24 has been withdrawn.

15. *Claims 14, 15, 18, 19, 44 and 45 remain rejected over Sacks, as modified by Mykleby and Gettle et al.*

The arguments regarding claims 14, 15, 18, 19, 44 and 45, have been addressed above.

Application/Control Number: 08/747,471

Page 7

Art Unit: 3727

16. *Claim 51 remains rejected over Chavez, as modified by Sholl.*

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Chavez teaches the use of a pin to connect two elements. Sholl teaches the use of a rope to connect two elements. The teaching and suggestion to attach two elements using a rope is found in the secondary reference of Sholl.

17. *Claim 52 remains rejected over Sacks, as modified by Sholl.*

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "that the pin can be formed of flexible material selected from the group consisting of rope, roving, unitape, shield, braid, belt, fabric and combinations thereof", as set forth in page 4 of the response.) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

18. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-

Application/Control Number: 08/747,471

Page 8

Art Unit: 3727

MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

19. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703)305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into group 3720 will be promptly forwarded to the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niki M. Eloshway whose telephone number is (703) 308-1606. Any inquiry of a general nature or relating to the status of this application should be directed to the 3700 Customer Service Office at (703) 306-5648.

This application is abandoned in view of:

1. ☒ Applicant's failure to timely file a proper reply to the Office letter mailed on 26 June 2001.
 - (a) ☐ A reply was received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the period for reply (including a total extension of time of _____ month(s)) which expired on _____.
 - (b) ☐ A proposed reply was received on _____, but it does not constitute a proper reply under 37 CFR 1.113 (a) to the final rejection. (A proper reply under 37 CFR 1.113 to a final rejection consists only of: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114).
 - (c) ☐ A reply was received on _____ but it does not constitute a proper reply, or a bona fide attempt at a proper reply, to the non-final rejection. See 37 CFR 1.85(a) and 1.111. (See explanation in box 7 below).
 - (d) ☒ No reply has been received.
2. ☐ Applicant's failure to timely pay the required issue fee and publication fee, if applicable, within the statutory period of three months from the mailing date of the Notice of Allowance (PTOL-85).
 - (a) ☐ The issue fee and publication fee, if applicable, was received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the statutory period for payment of the issue fee (and publication fee) set in the Notice of Allowance (PTOL-85).
 - (b) ☐ The submitted fee of \$_____ is insufficient. A balance of \$_____ is due.
The issue fee required by 37 CFR 1.18 is \$_____. The publication fee, if required by 37 CFR 1.18(d), is \$_____.
 - (c) ☐ The issue fee and publication fee, if applicable, has not been received.
3. ☐ Applicant's failure to timely file corrected drawings as required by, and within the three-month period set in, the Notice of Allowability (PTO-37).
 - (a) ☐ Proposed corrected drawings were received on _____ (with a Certificate of Mailing or Transmission dated _____), which is after the expiration of the period for reply.
 - (b) ☐ No corrected drawings have been received.
4. ☐ The letter of express abandonment which is signed by the attorney or agent of record, the assignee of the entire interest, or all of the applicants.
5. ☐ The letter of express abandonment which is signed by an attorney or agent (acting in a representative capacity under 37 CFR 1.34(a)) upon the filing of a continuing application.
6. ☐ The decision by the Board of Patent Appeals and Interference rendered on _____ and because the period for seeking court review of the decision has expired and there are no allowed claims.
7. ☐ The reason(s) below:

The owner*, AlliedSignal Inc. of 100 percent interest in the above-identified application hereby disclaims a terminal part of the term of any patent granted the above-identified application equivalent to: (1) if the above-identified application is a design application, the period of abandonment of the above-identified application, and (2) if the above-identified application is a utility or plant application, the lesser of: (a) the period of abandonment of the application; or (b) the period extending beyond twenty years from the date on which the above-identified application was filed in the United States or, if the application contains a specific reference to an earlier filed application(s) under 35 U.S.C. 120, 121, or 365(c), from the date on which the earliest such application was filed. This disclaimer also applies to any patent granted on a utility or plant application filed before June 8, 1995, or a design application, that contains a specific reference under 35 U.S.C. 120, 121, or 365(c) to the above-identified application. This disclaimer is binding upon the grantee, and its successors or assigns.

Check either box 1 or 2 below, if appropriate.

- ☐ For submissions on behalf of an organization (e.g., corporation, partnership, university, government agency, etc.), the undersigned is empowered to act on behalf of the organization.
- ☒ The undersigned is an attorney or agent of record.
